

Deep care for a mirror-like shine effect

The product combines the classic properties of cleaning and care by using nano technology. The deeply penetrating preserving concentrate with an innovative combination of surfactants may already be applied in the shampoo unit and supports dehydration – particularly in plants with high speed conveyors or allowing only a short time for water breaking. In addition, the paint surface is optimally prepared for the further use of preservatives. The integrated special shine formula refreshes the paint colour and provides a brilliant shine effect through light refraction.

Application / Dosage

Dosage in the car wash only approx. 10 to 15 ml.

Dosage in the self-service system varies depending on the desired foam pattern and available technology.

Max. Exposure time

According to VDA-guideline: max. 5 minutes.

Do not allow the product to dry!

Available container types

Product properties
