EV200 – Prewash EVENTUM

Web: https://www.dr-stoecker.de/en/products/car-wash-chemicals-products/pr-wash-agents/prewash-eventum-ev200/

Strongly alkaline and extremely dense special foam in the area “Wall of Foam”/Lava Wall & Foam cannons

This cleaning concentrate is specially designed for use in “walls of foam” an foam cannons, as it beats all previous standard pre-cleaners with its extremely fine-pored and cross-linked structure. In foam walls, the Prewash EVENTUM creates a closed foam curtain and provides the driver not only a highly efficient prewash but also an extraordinary foam experience right at the beginning of the car wash. In foam cannons in the self-service area, a voluminous foam is produced that intensively dissolves even hard-to-remove dirt. Because of its efficient combination of tensides, the service water is not polluted more even though the foam volume is increased.

Application / Dosage

For the best foam wall, the air, water and cleaner must be optimally adjusted. Usage for an extremely tight foam wall approx. 10 to 25 ml of concentrate per vehicle, depending on technical conditions.

Max. Exposure time

If the surface temperature is high, it is essential that the surface cools down.
Do not allow the product to dry!

Available container types

Can, 25 l
Art-Nr.: 525012

Product properties

- strongly alkaline
- only approx. 25-35 ml used per vehicle
- pleasant fresh scent
- for foam walls “Wall of Foam” & Foam cannons
- highly efficient pre-cleaning
- extraordinary foam experience
- kind to service water

Technical data

- pH value: 13,5
- Density: 1,09
- Colour: light, clear
- Scent: pleasant fresh scent
- Frost resistance: + 4 °C
