

Dr. Stöcker wet glass cleaning wipes in a resealable bag of 10

Sustainable care for the interior – ideal for quick sales in shops

Dr. Stöcker Cockpit Care Wet Wipes are the ideal addition to your vehicle care product range. The wet wipes care for and protect plastic surfaces, refresh colours and have an antistatic and water-repellent effect. They are suitable for all smooth and grained plastic surfaces in the vehicle interior – from the dashboard to the door trim.

The wipes are made of high-quality viscose fabric from 100% plant-based fibres, are PEFC-certified and completely free of plastic, which makes them particularly sustainable. The resealable press-to-close seal prevents the wipes from drying out.

Thanks to their compact size, the wipes fit perfectly in the centre console or door compartment and are versatile, even outside the vehicle. A practical product that will impress your customers and is ideal as an additional sale.

Application / Dosage

Remove cloth, wipe surface – done! If necessary, polish with a dry cloth. Close the packaging tightly after use.

Note: Do not use on leather, steering wheels, pedals, radios, dashboards, displays/screens or navigation devices. Do not use on hot surfaces or in direct sunlight.

Available container types

12 x 10 Tücher im Displaykarton
Art-Nr.:

6810006601
