

Liquid concentrate for the exterior wash (main wash) of vehicles

KaChem clean Außenreiniger F from Dr. Stöcker is a slightly foaming, highly effective concentrate that has been specially developed for the intensive cleaning of trucks and their bodies. Whether tarpaulins, box bodies or container bodies – this cleaner offers thorough cleaning and at the same time ensures a shiny finish.

Application / Dosage

Dilute with water and apply to the surfaces to be cleaned. After a short exposure time, rinse off the dirt with water

Manual: For application using the pre-spray high-pressure (VHD) method: spray on, leave to take effect, brush in between if necessary and spray off using high pressure.

By machine: Brush washing system: 1-2%

Pre-spray high-pressure (VHD) process: 1-5%

Available container types

Can 20 kg

Art-Nr.: 7762020

Product properties

- Lightly foaming: For even distribution and effective cleaning.
- Highly effective: Effortlessly removes dirt, road residue and other soiling.
- Versatile: Suitable for tarpaulins, box and container bodies and other exterior surfaces.
- Care effect: Special ingredients leave a particularly shiny and well-groomed surface.
- Very efficient and economical to use.
