

**Cleaning product with high degreasing performance for hall, floor and factory cleaning**

The KaChem clean Bodenreiniger from Dr. Stöcker is a highly effective special product for workshop and factory cleaning. Developed to remove even stubborn dirt, oil and gumming from a wide variety of surfaces, it ensures thorough and fast cleaning. Thanks to its outstanding degreasing performance, KaChem clean cleaner is also ideal for cleaning engines and parts. It reliably removes grease and oil stains and leaves behind a clean, non-slip surface without damaging the materials. Perfect for professional use in workshops, industrial operations and machine rooms.

Application / Dosage

By machine: 2-10%

Application on walls, floors, surfaces made of concrete, plastic, ceramics, painted or enamelled surfaces in work, storage or social areas.

Please note: When using floor scrubbing machines, the suction lip must be raised when the cleaning solution is first applied to give the cleaner time to take effect.

Manually: 5-20% with sponge, brush or cloth
