

Special product for cleaning surfaces in the vehicle interior – plastic or textiles

KaChem clean Interior from Dr.Stöcker is a powerful liquid cleaning product that has been specially developed for cleaning vehicle interiors. With its effective formula, it effortlessly removes a wide variety of soiling from all water-resistant surfaces. Whether plastic, textiles, leather or plastic parts – KaChem clean Interior ensures thorough and gentle cleaning and leaves a fresh, well-groomed appearance.

Application / Dosage

The cleaner is applied at a dilution of 1:2 for grease and stubborn stains, 1:5 for upholstered furniture and floor mats and 1:10 for yellowing and nicotine. Spray the cleaner onto the surface at the recommended concentration, apply light pressure to the surface and rub with a clean towel.

Max. Exposure time

A few minutes before it can be rubbed off.
