

Acidic, highly effective rim cleaner for removing brake dust, flash rust and other mineral soiling from painted aluminium and metal rims

KaChem clean Lavorix 10 from Dr. Stöcker has an intensive effect against inorganic dirt and removes even problematic dirt such as brake pad abrasion or road grime. Thanks to its high creeping capacity and dispersing effect, the dirt is infiltrated, dispersed, dissolved and can then be easily washed off with water.

Application / Dosage

Dilute 1:5 to 1:7 (chemical: water) depending on soiling.

Apply to the soiled surface and leave to act as required.

Its special formula dissolves the dirt and ensures that it can be easily washed off.

Available container types

Can 20 kg

Art-Nr.: 7765020

Product properties

- Highly effective: Reliably removes inorganic dirt, including brake pad abrasion and road grime.
- High creeping capacity: Gets deep into the dirt and infiltrates it to ensure thorough cleaning.
- Dispersing effect: Dissolves and disperses the dirt so that it can be washed off more easily with water.
- Versatile use: Ideal for cleaning vehicles, machinery, workshops and other areas contaminated with inorganic dirt.

Technical data

- pH value: 0,25
- Density: 1,250
- Colour: colourless, clear
- Scent: characteristic
- Frost resistance: + 4 °C
