

Car Wash Chemicals Catalogue 2023

www.dr-stoecker.com

ECOPRO

Environmentally friendly car wash chemicals from Dr. Stöcker

Our car wash chemical series **ECOPRO** has been awarded the strict Scandinavian environmental label „Nordic Swan Ecolabel“. This means that the products exceed the requirements for the biodegradability of the ingredients according to the European Detergent Regulation. The ingredients used also increase the safety for people and the environment.

Our **ECOPRO** products are:

- NTA- and AOX-free
- free of silicate and mineral oil
- without dyes
- allergen-free
- biodegradable
- awarded with the „Nordic Swan Ecolabel“

ECOPRO is available as pre-cleaner, foam, shampoo, dryer and preservative in the following packaging forms: Canister, EasyPack and Bag-in-Box. (see back page)

OVER 60 SHINING YEARS

A company that has been a shining example.

The chemical factory Dr.Stöcker is a global manufacturer of specialty chemicals for cleaning processes and surface protection.

Dr.Stöcker is a pioneer in machine car washing. We are a strong medium-sized company. We are owner-managed. For more than 60 years, we have been producing washing and care products for car washes, gantry systems and self-service car washes - from entrepreneurs for entrepreneurs.

We develop. We produce. We are constantly subject to external and independent audits and were the first in the industry to be certified according to DIN ISO 9001.

Results, which make a difference.

Test us on your washing results. Test us on your sales. And if you like, measure us by the satisfaction of car wash operators, who have made us the leading brand in the industry for many years.

Sustainability at Dr.Stöcker - a lived overall concept.

Acting responsibly towards society and our resources is an integral part of our policy, one of the central elements of our corporate strategy and is based on the United Nations' Agenda 2030 with its 17 goals.

CLEAR SOLUTIONS

Check the series with us.

The Dr. Stöcker car wash chemicals are characterized by a clear and lean program structure as well as excellent product quality and an outstanding price-performance ratio. Your added value: Clear services, a clear structure and more transparency for you!

PRIME TEC

Premium care with the PRIMETEC effect for your wash business.

The PRIMETEC series combines the products foam, shampoo, preservative and dryer in an unprecedented, revolutionary symbiosis, which creates a layered structure of the care components. When the complete series is used, a mutually supporting added value is created, which ensures a particularly dense surface sealing with a strong repair effect and a revolutionary deep shine. The smallest unevennesses are already evened out in the washing process, which reduces the cleaning effort for subsequent washes.

ECOPRO

Environmentally friendly car wash chemistry.

Our ECOPRO products are NTA and AOX free, silicate and mineral oil free, dye free, allergen free and biodegradable.

The entire ECOPRO series has been awarded the strict Scandinavian environmental label "Nordic Swan Ecolabel". This means that the ECOPRO products exceed (pre-cleaner, foam, shampoo, dryer and preservative) exceed the requirements for the biodegradability of the ingredients according to the Detergents Regulation.

The raw materials used also increase safety for people and the environment.

AQUALIFE

This is what your service water needs.

AQUALIFE is the ultimate solution when it comes to improving your domestic water cycle. And that in every respect. Thanks to HydroPro technology, the products Scent Foam, Neutral Shampoo, Shine Preserver and Shine Dryer of the Dr. Stöcker AQUALIFE series support the biological cycle and act as power food for the microbiology.

EVENTUM

The XXL foam experience.

Would you like to offer your customers an extraordinary car wash experience? Then go for the foam experience now with the Dr. Stöcker EVENTUM series. Extremely dense special foams for use in a "Wall of Foam"/Lava Wall and in self-service areas.

FORTE

The ultra-strong premium program.

Do you have a passion for car wash? Then you'll enjoy perfect wellness for your car with these premium programs. The result is so good that your customers can appreciate it with all their senses. Pure luxury - for your financially strongest car wash customers with the highest demands. Market leaders in pre-cleaning, drying and preservation - with your system and our top products, your customers will experience the measurable difference.

POWERPLUS

Measurable difference in numerous fragrance variations.

You want to set new standards? You appreciate deliberate and perfectly coordinated formulations? Then go for the success! High efficiency due to double concentrates as well as superior quality, low consumption costs and first-class results make this series a success - for you and your customers.

PLUS

Our powerful but gentle all-rounders.

You like a strong cleaning effect and at the same time caress the polish? By using this series you will meet the strict directives of automobile manufacturers already today. The balanced relationship of strong cleaning power and modern raw material components will turn this automatic car wash into a symbiosis of cleaning and care.

BASIC

The most important products in good quality.

Is your gantry or car wash plant temporarily only marginally frequented? Then experience brilliant basic services in good quality at absolutely favorable prices and good results!

CLEAR SOLUTIONS

Trust into a system with comfort.

Dr.Stöcker also makes your work easier and more successful through improvements in detail. In Dr.Stöcker ColorCode, an intelligent color system for product identification, each product group has its own color. This facilitates product identification and avoids mix-ups - undesirable mixtures are a thing of the past!

And the color coding system ensures simple and safe handling in every respect. This is also evident in product identification, inventory control and order processing. Safety, orderliness and cleanliness quickly become convenient fast-selling item.

These colors and pictograms provide the ultimate overview:

White: Wheel rim cleaner

Red: Pre-cleaner

Green: Foam cleaner

Yellow: Shampoos

Blue: Dryer

Orange: Preservatives

Black: Special products

Black: Facility cleaner

Black: Water treatment

Types of packaging

Dr. Stöcker also optimizes its packaging in terms of sustainability and customer benefit. The result is resource conservation through reduced use of packaging material as well as reduced energy consumption and emissions.

We are also on your side when it comes to easy handling and optimized storage. Regardless of whether you opt for the Dr. Stöcker "60-liter dosing system" or "Bag-in-Box with the clever wall-mounting system with EasyClick connection and fill level indicator", product changes take place during operation, and there is no need for pump deaeration.

The Dr. Stöcker program offers a well thought-out selection of packaging sizes:

Bag-in-Box, 20 liters:

The "Bag-in-Box" is a sustainable alternative to the standard canister. A stable outer carton protects the 20-liter foil bag inside, thus saving 90% plastic.

Item number: xxxx-42

EasyPack, 4 x 5 liters:

The value pack, which already won an award in 2013, combines easy handling with sustainability. A sturdy shipping box protects the four 5-liter foil bags inside.

Item number: xxxx-20

Canister, 25 liters:

The previous and for years proven standard container for car wash chemicals.

Item number: xxxx-12

Barrel, 200 liters:

The 200-liter barrel is a favored container, especially for bulk customers with a high throughput. It combines an optimal combination of volume and handling.

Item number: xxxx-28

IBC, 1.000 liters:

The 1,000 liter IBC is the large industrial container for "heavy users".

Item number: xxxx-29

PURE PERFORMANCE

Brilliant service - we are present.

You can find our Dr. Stöcker sales representatives all over the country.
Regional. Personal. Flexible. Professional and with excellent performance.

Have you got any queries? Do you need any support? Would you like to place an order? Or to make an appointment? Give us a call! Your contact person in our customer care centre is looking forward to you - reliably and professionally.

The setting makes the difference.

Our free of charge setting & dosing service provides the effective use of all agents - and savings up to 50 %. Our qualified experts connect your plant and our products on site to an optimised unit of highest standard.

Dr. Stöcker gets things rolling.

For supporting you directly on site, our professional technicians and chemists come to your company along with our perfectly equipped Dr. Stöcker MobiLab, our special lab on wheels. With a comprehensive analysis of your waste water, you'll receive valuable hints how to optimise your washing processes and results.

We promote your performance.

We advertise for you. Informative. Charming. Seasonal. Always up-to-date.

And show the world what you have to offer. Our Dr. Stöcker Promotion and Marketing Service provides you with indoor and outdoor advertising materials attracting attention - including free of charge brochures, banners and posters.

For your success all along the line.

WHEEL RIM CLEANER

Shiny wheel rims along with radiant polishes.

A complete and satisfying car wash is last but not least defined by the cleanliness of wheel rims. Particularly wheel rims are an important eye catcher and are crucial for the complete visual appearance of the vehicle. Your wheel rims will become eye catchers with the Dr.Stöcker wheel rim cleaner. It easily removes particularly persistent dirt such as brake pad abrasion and road dirt. The corrosion prevention effectively protects, in addition to the powerful cleaning, security relevant component parts such as wheel bolts.

A tip from Dr.Stöcker!

Clean wheel rims after the car wash are a must for satisfied customers. Use the Dr.Stöcker Wheel Rim

Cleaner in order to offer the best car care service package to your customers.

Please do not leave products to dry. Hot wheel rims have to cool down before treatment. Do not clean damaged wheel rims. Please only spray alkaline or acid resistant parts of the vehicle depending on type of wheel cleaner. Please thoroughly rinse vehicle with plenty of clear water after max. 1 minute.

BENEFITS WITH DR.STÖCKER

- High-efficient products
- Powerful cleaning even for strained wheel rims
- Removes even the most persistent dirt
- High capability to absorb dirt
- Corrosion protection for wheel bolts

Active Wheel Rim Cleaner forte – FT100

Alkaline special cleaner for the removal of persistent dirt.

ph-value: 13
alkaline
only approx. 20 ml consumption per vehicle
with pleasant scent
for stubborn dirt and road salt
with corrosion protection for wheel and rim bolts
not for anodised rims

canister, 25 litre
item number: 540012

bag-in-box, 20 litre
item number: 540042

Intensive Wheel Rim Cleaner forte – FT101

Acid wheel rim cleaner with a three-acid combination for stubborn dirt on wheel rim

ph-value: 0,3
acidic
only approx. 20 ml consumption per vehicle
pleasant characteristic scent
for tough stains
High creeping capacity
Remains liquid and chemically effective on rims for a longer time
with biological degradable surfactants and corrosion protection

canister, 25 litre
item number: 652212

Active Wheel Rim Cleaner Plus – P100

Mild-alkaline rim cleaner for gentle cleaning of the material

ph-value: 10,5
mild-alkaline
only approx. 20 ml consumption per vehicle
pleasant characteristic scent
perfect for steel and light alloy rims
thoroughly removes dirt
with corrosion protection for wheel and rim bolts

EasyPack, 4 x 5 litre
item number: 653020

PRE-CLEANER

Essential for achieving the best results.

Manual pre-washing is essential to achieve good cleaning results every time. Resin, tar, bird drop-pings and insects remains are partially dissolved and can then be easily removed by the machinery. Additionally, particular interferences to cleaning due to the shape of the vehicle or the condition of the paintwork can be alleviated by pre-washing.

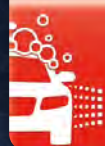

A tip from Dr.Stöcker!

The most effective pre-wash agents for professional use are those with a high pH-value (>10), e.g. Active Pre-Wash Agent Forte. Ensure that the vehicle is evenly moistened from top to bottom. A quick and thorough pre-wash is always worth your while, especially with the new alternative or textile washing materials. The presoak device from our accessories catalogue is perfect for this work.

If the customer shall pre-wash his car himself, with a presoak device or in self-service areas, we recommend using a modern cleaner with a maximum pH-value of 10. The Dr.Stöcker Special Insect Remover or the Active Pre-Cleaner Plus, supplied at this strength, will not cause any damages even if it dries up (certified and tested by the Forschungsinstitut für Pigmente und Lacke e.V., Stuttgart).

BENEFITS WITH DR.STÖCKER

- Quick and powerful effects
- Better cleaning results in all types of equipment, especially with alternative or textile materials
- Protects paint coating by removing coarse dirt
- Cost-effective due to high yield
- Highly concentrated, limited storage space required and little packaging material to dispose of
- Biodegradable surfactants, EC Directive 648/2004 compliant
- Guaranteed compliance with waste water limit values when used acc. to the directives

Active Pre-Wash Agent Forte – FT200

Strong-alkaline, fast and extremely powerful cleaner for pre-cleaning

ph-value: 13,5
strong-alkaline
only approx. 30-50 ml per 10 l of water per vehicle
pleasant orange scent
fastest and most effective pre-cleaner in the collection
for problematic dirt
perfect for pre-sprayers and high-pressure cleaners
material-friendly because of water softener

canister, 25 litre
item number: 656212

bag-in-box, 20 litre
item number: 656242

Pre Cleaner forte – FT202

Strong-alkaline pre-cleaner for ultra-fast premium pre-cleaning

ph-value: 13,5
strongly alkaline
fresh citrus scent
extremely good cleaning performance - even rims
short contact time
special foam power

canister, 25 litre
item number: 666212

Active Precleaner ECOPRO - EP200

Strong-alkaline, fast and powerful pre-cleaner from the environmentally friendly ECOPRO car wash chemical

ph-value: 13,7
strong-alkaline
only approx. 30-50 ml consumption per 10 l water per vehicle
for problematic soiling
fast, powerful and thorough
ideal for pre-spray lances and high-pressure equipment
extremely easily biodegradable
NTA- and AOX-free
allergen-free
without dyes

canister, 25 litre
item number: 340212

EasyPack, 4 x 5 litre
item number: 340220

bag-in-box, 20 litre
item number: 340242

Prewash EVENTUM – EV200

Strong-alkaline and extremely dense special foam in the area "Wall of Foam"/Lava Wall

ph-value: 13,5
strongly alkaline
only approx. 25-35 ml used per vehicle
pleasant characteristic scent
for foam walls "Wall of Foam"
highly efficient pre-cleaning
extraordinary foam experience
kind to service water

canister, 25 litre
item number: 525012

Active Cleaner Power Plus – PP200

Alkaline pre-cleaner especially for car washes for cleaning paint surfaces and rims, perfect in winter

ph-value: 12,8
alkaline
only approx. 20-50 ml per vehicle
fresh orange scent
for rough dirt and problematic soiling
perfect for salt incrustations in winter
perfect for pre-spray bows or lances
with water softener

canister, 25 litre
item number: 654112

Active Pre-Cleaner Plus – P200

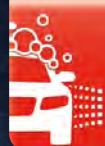

Mild alkaline pre-cleaner for pre-spray equipment, which is proven not to cause paint damage.

ph-value: 10
mild-alkaline
only approx. 20-50 ml per vehicle
pleasant orange scent
especially for pre-sprayers
gentle on paintwork
removes dirt and cleans rims
material-friendly because of water softener

canister, 25 litre
item number: 656312

Active Pre-Spraycleaner – P201

Mild-alkaline pre-cleaner for pre-sprayers, which is proven not to cause paint damage

ph-value: 10
mild-alkaline
better concentration of use: 1 EasyPack per 50-60 l of water
stylish fresh scent
perfect for alternative washing materials
with water softener, dispersing agent and anti-scale protection for water

EasyPack, 4 x 5 litre
item number: 657120

Cleaner VPS-N – P202

Strong-alkaline and powerful pre-cleaner

ph-value: 13,5
strong-alkaline
only approx. 20-50 ml per vehicle
pleasant characteristic scent
for problematic soiling
ideal for pre-sprayers and high-pressure machines
material-friendly because of water softener

canister, 25 litre
item number: 522912

Discontinued item

Cleaner Basic – B200

Mild-alkaline pre-cleaner for price-sensitive applications

ph-value: 9,8
mild-alkaline
only approx. 30-50 ml per vehicle
pleasant characteristic scent
ideal for high pressure units and self-service systems
good product to get started
for normally soiled vehicles
with water softener

canister, 25 litre
item number: 530012

Special Insect Remover – SP200

Mild alkaline insect remover for the effective removal of coarse dirt and insects

ph-value: 10,5
mildly alkaline
pleasant characteristic scent
effective against dried insect remains
gentle on coatings and rims
suitable for self-service areas

canister, 25 litre

item number: 653912

Cleaning Powder Extra – SP201

Alkaline powder concentrate for pre-cleaning

ph-value: 11
alkaline
especially for high-pressure units and self-service units with screw conveyors
intensive dissolving power
for problematic soiling and insects as well

bag, 20 kg

item number: 680110

Pre Cleaner Red Berry – SP203

Very fast-acting and pleasantly smelling professional pre-cleaning concentrate

ph-value: 13,5
pleasant fragrance
fast acting
gentle to the material
also for problematic dirt
perfect for soaking pre-spray bends, lances and high-pressure units
with water softener
excellent foam formation

canister, 25 litre

item number: 666112

bag-in-box, 20 litre

item number: 666942

FOAM CLEANER

Top off your car wash plant with a crest of foam.

The best washing results are achieved with a machine-applied foam pre-wash when cleaning in a tunnel car wash system or gantry car wash. The highly effective Dr.Stöcker foam cleaner still achieves 100% performance and a clean car wash experience even at high conveyor speeds. The especially fine and stable foam of our products adheres to the surface of the vehicle longer and is therefore able to achieve better penetration and hence more thorough cleaning. In self-service carwashes, you also offer your customers a visual as well as fragrant carwash experience!

A tip from Dr.Stöcker!

Take care that you use the right pre-cleaning product - not only for the main cleaning! Make the car wash visible for your customers! However, your customers shall not only experience the visual result but also the sensoric feeling of freshness and cleanliness - with Scent Foam PowerPlus. Using alternative or textile washing materials, we recommend the products with the name affix "Active", which are appropriate for the specific requirements of these washing materials.

BENEFITS WITH DR.STÖCKER

- Powerful cleaning with high-quality agents
- Products for all types of washing materials
- Additives for a pleasant scent
- The tensides are biodegradable and comply with the EU Act 648/2004 for detergents
- The compliance with the waste water limit values is guaranteed when applied acc. to the directions.

Scent Foam PrimeTec – PT300

pH-neutral premium foam concentrate with repair effect using PRIMETEC technology

ph-value: 6,3
pH-neutral
only approx. 5-10 ml per vehicle
fresh citrus scent
smoothes the surface of the paint with a repair effect
strong foam production with very strong foam bubbles
better washing results because of longer contact time

canister, 25 litre

item number: 663012

pH-neutral foam concentrate from the environmentally friendly ECOPRO car wash chemical series with an

ph-value: 6,5
pH-neutral
only approx. 5-10 ml consumption per vehicle
intensive fruity scent
strong foam development with very stable foam bubbles
better washing results due to longer contact time
extremely easily biodegradable
NTA- and AOX-free
allergen-free
without dyes

canister, 25 litre

item number: 310412

EasyPack, 4 x 5 litre

item number: 310420

bag-in-box, 20 litre

item number: 310442

Scent Foam AQUALIFE – AL300

pH-neutral foam concentrate with HydroPro technology for process water optimisation

ph-value: 6
pH-neutral
only approx. 5-10 ml per vehicle
strong fresh scent
lastingly improves the quality of the water and helps to reduce bad smells.
reduces iron concentration and carbon monoxide (COD) value in the water.
better washing results because of longer duration of use
high dirt-carrying power

canister, 25 litre

item number: 310312

EasyPack, 4 x 5 litre

item number: 310320

bag-in-box, 20 litre

item number: 310342

Self-Service Foam EVENTUM – EV300

pH-neutral, extremely tight special foam for use in self-service areas

ph-value: 7,9
pH-neutral
only 25-35 ml needed per vehicle
pleasant and characteristic scent
especially for self-service areas
exceptional foaming experience
no extra pollution of the process water

canister, 25 litre
item number: 525312

EasyPack, 4 x 5 litre
item number: 525320

bag-in-box, 20 litre
item number: 525342

Permormance Foam EVENTUM – EV301

pH-neutral, extremely tight special foam for use in "Wall of Foam"

ph-value: 7,5
pH-neutral
only 25-35 ml needed per vehicle
pleasant characteristic smell
perfect for foam walls
compact foam wall with extraordinary foam sensation
no additional pollution of the process water

canister, 25 litre
item number: 525112

SHAMPOOS

Perfect cleaning not only for the paint coating.

The dirt particles already dissolved during the pre-washing are completely encapsulated and removed during the washing process. The shampoo has two different effects at the same time: first, the vehicle is cleaned and second, the washing material is kept clean and wear and tear is reduced. A sufficient amount of water for removing the dirt and leaving nothing on the surface of the paint is essential here.

A tip from Dr.Stöcker!

The perfect combination of washing equipment and cleaning agents will produce the best results; reduce the wear and tear on your equipment as well as the quantity of cleaning agents used. Utilize the free of charge Dr.Stöcker Setting & Dosing Service and save money.

BENEFITS WITH DR.STÖCKER

- High ability to carry off dirt
- Keeps washing materials clean and extends their life
- High-quality, biodegradable surfactants from renewable sources of raw materials and compliant with the EC 648/2004 Directive
- Guaranteed compliance with waste water limit values when used acc. to the directives

Gloss Shampoo PRIMETEC – PT400

Mild acidic premium shampoo concentrate with repair effect using PRIMETEC technology

ph-value: 2,4
mild acid
only 5-8 ml needed per vehicle
fresh citrus scent
for roll over car washes and tunnels
with repair effect
suitable for biological process water treatment systems
removes and prevents yellow-brown iron deposits
helps to prevent calcium build-up

canister, 25 litre

item number: 650942

DRYER

Easy drying.

Even the best of blowers will not achieve perfect results without a quality drying agent. The secret of our distinctive performance improvement is based on state-of-the-art micro-emulsion technology and utilizing high-performance active components. These active contents spontaneously break up the film of water over a large surface and virtually run the water off even before the blower arrives. In this way, perfect drying of the vehicle is achieved, even at high conveyor speeds..

A tip from Dr.Stöcker!

Unsatisfied customers repeatedly complain about a poor drying as remaining water and its additives dry up and leave un-wanted stains. Increase your customers' satisfaction and loyalty by using a high-quality drying agent.

Use the free of charge Dr.Stöcker setting & dosing service: Our qualified experts connect your plant and our products on site to an optimised unit of highest standard.

BENEFITS WITH DR.STÖCKER

- Rapid and extensive water breakup at all degrees of water hardness
- Special deep shine due to a thickening of the water-repellent film
- Reliable - even in rapid gantry car wash and tunnel car wash systems
- All drying agents comply with the criteria of VDA-classification A
- Guaranteed compliance with the waste water limit values when applied acc. to the directives, as free of hydrocarbons

Gloss Dryer PRIMETEC – PT600

Premium dryer with repair effect using PRIMETEC technology

ph-value: 4

Premium product with excellent drying result
only 8-10 ml needed per vehicle
Amazing shine effect
repairs micro-scratches in the surface
pleasant characteristic scent
extremely smooth and long-lasting surface finish
also for convertibles

canister, 25 litre

item number: 666412

EasyPack, 4 x 5 litre

item number: 66420

Gloss Dryer ECOPRO - EP600

High performance drying aid from the ECOPRO environmentally friendly car wash chemical series for shiny

ph-value: 4

outstanding drying result
only approx. 8-10 ml consumption per vehicle
perfect paint finish
perfect pearl run on glass
paint protecting effect
extreme gloss effect at all water hardnesses
extremely easily biodegradable
NTA- and AOX-free
allergen-free
without dyes

canister, 25 litre

item number: 610212

EasyPack, 4 x 5 litre

item number: 610220

--

item number: 610242

Gloss Dryer AQUALIFE – AL600

High-performance dryer with repair effect and HydroPro technology for process water optimisation

ph-value: 4,2

Improves the process water quality permanently
helps to eliminate bad smells
reduces iron content and COD concentration in the water
only 8-15 ml needed per vehicle
pleasant characteristic scent
paint-protecting effect with extreme gloss
excellent drying power
highly effective in all water qualities

canister, 25 litre

item number: 670512

EasyPack, 4 x 5 litre

item number: 670520

bag-in-box, 20 litre

item number: 670542

Gloss Dryer Perlution – PL602

High-performance dryer for the extra shine effect with all water qualities

ph-value: 4,2
high gloss effect with all water hardnesses
excellent drying result
only 10-20 ml needed per vehicle
pleasant characteristic scent
perfect flow of water beads on glass
paint protecting effect

canister, 25 litre

item number: 665112

EasyPack, 4 x 5 litre

item number: 665120

bag-in-box, 20 litre

item number: 665142

Gloss dryer forte – FT600

High-performance dryer for brilliant results

ph-value: 4
excellent drying result
perfect paint finish
only 8-10 ml needed per vehicle
pleasant characteristic scent
perfect flow of water on glass
paint protecting effect
extreme gloss effect with all water hardnesses

canister, 25 litre

item number: 656012

EasyPack, 4 x 5 litre

item number: 656020

Gloss Dryer PowerPlus – PP600

Silicone-free high-performance dryer for perfect results, even at high transport belt speeds

ph-value: 4,5
silicone-free
fast, powerful dryer
only 8-10 ml needed per vehicle
pleasant light citrus scent
Improved flow of water beads
minimum microbead formation

canister, 25 litre

item number: 653312

EasyPack, 4 x 5 litre

item number: 653320

Basic Dryer – B601

Low-cost and silicone-free dryer for all car washes

ph-value: 4,5
silicone-free
low price starter-product
only 10-15 ml consumption per vehicle
pleasant characteristic fragrance
suitable for all systems
good drying results with all water hardnesses

canister, 25 litre

item number: 530312

EasyPack, 4 x 5 litre

item number: 530320

PRESERVATIVES

Brilliant protection.

Preservation turns the car wash into car care. Using the preservatives of our series forte & Nano-Plus the paint care achieves brilliant results - that's what your customers want for their cars. Adding improved drying properties and paint surfaces which are perfectly protected against damages resulting from environmental influences - that's what is offered by our nanotechnology and the innovative micro emulsion technology we use for our car care.

A tip from Dr.Stöcker!

To achieve the greatest customer satisfaction, your customers' vehicles should brilliantly sparkle in the sun after the car care. Therefore, it's worth it to use a high-quality preservative (e.g. our best preservative *Gloss Preservative PRIMETEC*) and also to find the perfect dosing as using a too low quantity, the water beading effect diminishes soon and the gloss fades.

Did you know that drivers with a well-preserved vehicle come to a car wash more often than the "standard washer"? Being able to offer an appropriate program is really worth it! The Dr.Stöcker representatives will be pleased to provide more detailed information.

BENEFITS WITH DR.STÖCKER

- Basing on nanotechnology and innovative micro emulsion technology
- Outstanding "Like new" gloss effect
- Very thick surface sealing
- Perfect protection against road dirt, bird droppings, resin and insect residues
- Colour refreshing due to specific refraction
- Guaranteed compliance with waste water limit values when applied acc. to the directives, as free of hydrocarbons
- All preservatives comply with the criteria of VDA-classification A

Gloss Preservative PRIMETEC – PT500

Premium preservative with repair effect using PRIMETEC technology

ph-value: 4,1
premium product with amazing gloss effect
repairs micro-scratches in the surface
only 10-15 ml needed per vehicle
pleasantly fresh citrus scent
foam can be dosed
no need for rinse before drying
extremely smooth and long-lasting surface finish
for hot or cold conservation
also for convertibles

canister, 25 litre

item number: 665212

Foam gloss ECOPRO - EP500

High-performance foam preservative for a perfect surface finish with deep gloss from the environmentally

ph-value: 4
powerful
only approx. 10-20 ml consumption per vehicle
dense and smooth surface preservation
impressive gloss effect
protects against aggressive dirt
streak-free glass
extremely easily biodegradable
NTA- and AOX-free
allergen-free
without dyes

canister, 25 litre

item number: 670612

EasyPack, 4 x 5 litre

item number: 670620

bag-in-box, 20 litre

item number: 670642

Gloss Preservative AQUALIFE – AL500

Long-lasting surface preservation with repair effect and HydroPro technology for service water optimisation

ph-value: 4,1
effectively improves the quality of the process water
helps to prevent smells
repairs micro-scratches in the surface
only 10-20 ml needed per vehicle
pleasant characteristic scent
extremely smooth and long-lasting surface finish
excellent drying power
for hot or cold Preservation

canister, 25 litre

item number: 670412

EasyPack, 4 x 5 litre

item number: 670420

bag-in-box, 20 litre

item number: 670442

AcrylProtect forte – FT500

Durable surface preservative with repair effect.

ph-value: 3,8

smoothing of the paint surface with repair effect

only 15-25 ml needed per vehicle

pleasant citrus scent

with long-lasting, shine-increasing effect

canister, 25 litre

item number: 656712

EasyPack, 4 x 5 litre

item number: 656720

bag-in-box, 20 litre

item number: 656742

Foam Gloss forte – FT501

High-performance foam preservative

ph-value: 4

powerful

only 10-20 ml needed per vehicle

pleasant characteristic scent

thick and smooth surface preservation

amazing shine effect

protects against aggressive dirt

streak-free car window

canister, 25 litre

item number: 653512

Gloss Preserving Agent forte – FT502

High-performance preservative

ph-value: 4

tight and reflective surface conservation on all lacquers

only 10-12 ml needed per vehicle

refreshes bleached paintwork and plastic parts

protects against weather and climatic effects

excellent flow of water on glass and paintwork

canister, 25 litre

item number: 655512

Discontinued item

Perl wax forte – FT503

Special preservative for an extremely resistant finish and reflective gloss effect - at all water hardnesses

ph-value: 5

extremely effective with all water hardnesses
helps to prevent marks and wet vehicles
only 15-25 ml consumption per vehicle
with pleasant cherry scent
protects against aggressive weather conditions
with water-repellent pearl effect
with paint freshening effect
also for convertibles

EasyPack, 4 x 5 litre

item number: 665020

AcrylKonservierer Protect & Dry – FT504

Long-lasting surface preservation with repair effect and integrated, highly effective drying performance

ph-value: 4,1

long-lasting effect
only approx. 10-20 ml consumption per vehicle
extremely smooth surface finish
with repair effect
excellent drying performance
suitable for hot and cold preservation

canister, 25 litre

item number: 655912

EasyPack, 4 x 5 litre

item number: 655920

bag-in-box, 20 litre

item number: 655942

Hard Wax PowerPlus with nanotechnology – PP500

Premium preservative for surface sealing with above-average effect

ph-value: 4

resistant paint protector
only 20-25 ml needed per vehicle
pleasant characteristic scent
smooth surface finish with amazing shine
protects against aggressive dirt
cares for rubber and plastic parts
streak-free car windows
refreshes lacquer paint

canister, 25 litre

item number: 655412

Underbody Wax Plus – P500

Preservative for corrosion protection on the vehicle underbody

ph-value: 4,5
protects effectively against corrosion
against aggressive weather effects such as road salt
perfect for hard-to-reach, angled areas
only 40-80 ml needed per vehicle

canister, 25 litre

item number: 654912

Gloss Preservative Plus – P501

Silicone-free paint preservative and paint protection with special gloss effect

ph-value: 4,5
silicone-free
only 15-20 ml needed per vehicle
fresh citrus scent
high gloss effect
good care result
protects efficiently against weather and weather effects
suitable for hot preservation

canister, 25 litre

item number: 651612

EasyPack, 4 x 5 litre

item number: 651620

Basic Preserving Agent – B500

Low-cost and silicone-free preservative

ph-value: 4,5
low price
silicone-free
only 15-20 ml needed per vehicle
pleasant characteristic scent
protects against environmental and weather effects
good flow of water on the surface
beautiful gloss

canister, 25 litre

item number: 530512

EasyPack, 4 x 5 litre

item number: 530520

SPECIAL PRODUCTS

Highlights in your offer.

Dealing with problematic dirt or offering effective additional programs are significant factors for customer retention. Possible programs are a special paint coating care, wind-screen or interior cleaning. Our special products are highlights for the car care. Your customers will be thrilled by the shine of the paint coating of their vehicles achieved by using our Gloss Care Nano-Plus. But not only convince your customers visually: Our fresh scents bring an atmosphere of cleanliness into your car wash and your customers will combine this with outstanding cleaning performance.

A tip from Dr.Stöcker!

Talk to your customers about dirt that cannot be removed by machine and offer your extra service.

BENEFITS WITH DR.STÖCKER

- Special products for problematic dirt
- Scents for a pleasant atmosphere in the car wash

Polish Care Easy Shine – FT505

Easy-to-use care polish for every type of car wash

canister, 10 litre

item number: 460210

ph-value: 5,5

time-saving and convenient spray application

easy to handle

pleasant characteristic scent

weather and wash-resistant seal for up to 6 months

strong gloss-increasing effect

Highgloss NanoPlus – FT900

Deeply penetrating preserving agent for extremely reflecting brilliant finish

canister, 25 litre

item number: 656512

ph-value: 3,5

cleaning and care in one

deep-acting paintwork care

only 10-12 ml needed per vehicle

pleasant fruity scent

supports drying

paint refreshing effect

also for convertibles

Scent Naranja – SP901

Concentrate for scenting the car wash.

canister, 5 litre

item number: 659408

ph-value: n.a.

covers unpleasant smells

fresh scent of orange, tangerine and lemongrass

Discontinued item

Lemon Scent – SP902

Concentrate for scenting the car wash

ph-value: n.a.
masks unpleasant smells
fruity fresh lemon scent

canister, 5 litre

item number: 659708

Discontinued item

FACILITY CLEANER

If it says cleanliness - it must be clean.

You are selling care and cleanliness to your clients, so clean equipment is essential for your business. There are alkaline or acidic cleaning agents for every area of your business and every type of dirt. They allow you to easily remove limescale deposits, grease or oil stains on tiles, gates, window panes, floors and above all your machinery. Surfaces that have been cleaned should be sealed using a well suited product, just like when cleaning vehicles. This will extend the life span of your equipment and will delay resoiling.

A tip from Dr.Stöcker!

You shouldn't underestimate losses in turnover due to a neglected and dirty appearance of facilities or plants. Here too, cleanliness is an important factor of success; and not to forget - a regular complete cleaning is important to retain the value of your plant. Rely on tailored formulations which refrain from using highly aggressive basic substances - like the Dr.Stöcker cleaning products. The use of our cleaning products has been released by all leading machine manufacturers.

Dr.Stöcker offers a competitive full service for professional cleaning of your plant carried out by experts.

BENEFITS WITH DR.STÖCKER

- An appropriate cleaning product for every kind of dirt
- Affordable cleaning products
- All products are harmless to health when used correctly
- Training on the application by our representatives
- The competitive Dr.Stöcker offer: Professional cleaning of the plant by experts
- Guaranteed compliance with the waste water limit values in case of an application acc. to the directive, as free of hydrocarbons

Garage Floor Cleaner – SP700

Strong-alkaline special product for typical types of dirt on hall floors and in workshops

ph-value: 13,3
strong-alkaline
fast and effective

canister, 25 litre
item number: 652612

Stainless steel cleaner and decalcifier – SP701

Mild acidic stainless steel cleaner and descaler for wash halls and aggregates

ph-value: 0,5
mild acid
against scale build-up
environmentally friendly cleaning based on lemon acid

canister, 25 litre
item number: 521012

Intensiv Hall and Machine Cleaner SF – SP702

Special cleaner without hydrochloric acid for effectively removing of greasy and oily dirt

ph-value: 0,3
without hydrochloric acid
with corrosion protection agent
effectively removes scale, grease and oily dirt
complies with the standards of leading machine manufacturers

canister, 25 litre
item number: 652012

Intensive Hall and Machine Cleaner – SP703

Acidic special cleaner for the effective removal of limescale deposits as well as greasy and oily dirt

ph-value: 0,3

acidic

effectively removes scale, grease and oily dirt

complies with the standards of leading machine manufacturers

canister, 25 litre

item number: 652112

Moss and Algae Cleaner – SP704

Highly effective cleaning solution against moss and algae

ph-value: 10,5

Removes fouling from floors, glass surfaces, tiles and washing materials.

canister, 5 litre

item number: 658708

Discontinued item

WATER TREATMENT

Important for the environment and your bank account.

The permanently stricter environmental regulations as well as increasing costs for fresh water and waste water require an efficient waste water treatment. At lot of modern car washes al-ready have such treatment systems. For mechanical processes different additives are used, which flocculate or precipitate the dirt. So, the dirt can be removed easily after the sedimentation by filtration or skimming after flotation by means of smallest air bubbles. In biological plants, bacteria in combination with oxygen take efficient effects.

A tip from Dr.Stöcker!

The time and effort for waste water treatment can be reduced significantly. The better your plant works with the cleaning chemicals used, the less it contaminates the water. According to the principle "as much as necessary - as little as possible", the Dr.Stöcker setting & dosing service supports you finding the cleanest setting at the best possible cleaning results.

BENEFITS WITH DR.STÖCKER

- Highly efficient products
- State-of-the-art technology using microbiology
- Polymers in Dr.Stöcker Flocculant form larger flakes with an increased dirt bonding
- Waste water analysis directly on site with the Dr.Stöcker MobiLab, unique in our branch of business!

HydroPro AQUALIFE – AL800

Additive to the process water on HydroPro technology

ph-value: 5,5

- improves the quality of the process water
- reduces costs for technical water treatment
- prevents bad smells
- reduces the iron concentration
- reduces the COD level (oxygen demand)
- protects all facility components
- especially for biological treatment plants

EasyPack, 2,5 litre

item number: 668124

Discontinued item

Flocculant PowerPlus – PP800

Special product for flocculation or sedimentation of dirt particles in the waste water treatment plant - avoids

ph-value: n.a.

- extra powerful
- binds dirt particles in strong flakes
- for easy removal of impurities
- stops bad smells being produced in the process water
- reduces the oxygen demand (COD level)
- protects against corrosion

canister, 25 litre

item number: 657612

pH-Regulator Special – SP800

For adjusting the pH value in the process water

ph-value: 13,8

- regulates the pH level in the process water
- optimises the flocculation and precipitation of dirt particles

canister, 25 litre

item number: 658412

Aqua Fresh – SP801

Completely degradable disinfecting agent for recycled water

ph-value: n.a.
completely degradable
scentless
prevents the formation of smell in service water
not for biological treatment systems

canister, 25 litre

item number: 680712

Precipitant polymer-free – SP802

Special product for the sedimentation of dirt particles, free of polymers - for plants with gravel filters.

ph-value: n.a.
polymer-free
lets dirt particles sink into the service water
for easy removal of dirt particles
for systems with gravel filter

canister, 25 litre

item number: 657212

Flocculant – SP803

Special product for the flocculation or sedimentation of dirt particles

ph-value: n.a.
binds dirt particles in large flakes
for easy removal of dirt particles
for systems with filtration and flotation

canister, 25 litre

item number: 657312

Hydrodor BioAktiv – SP804

Microbiological additive for the process water

ph-value: 7,5

for process water treatment

prevents the formation of bad smells

reduces biofilms in pipes, basins and filter systems

makes it easier to remove dirt

fits into biological water treatment systems

canister, 25 litre

item number: 657712
